Uncommonly Fine Old Whisky.

MONTICELLO is as fine and as good a whisky as money can buy. Aged naturally—not artificially, remember—and at the price I sell it—\$3 a gallon—it's a real bargain. Sent securely sealed. Order by mail or telephone.

N. H. Duval, 1923 Pa. Ave. oc20-1, 4, 20

A Hinged Concrete Bridge.

From the San Francisco Chronicle. A hinged concrete bridge has been constructed across the Danube river, connecting the village of Insizklog with its railway station on the opposite side of the stream. The bridge is a novelty. It was designed and built under the supervision of Max Leibbrand, a well-known German engineer. The traffic between the two points to be connected being very small the appropriation had been put at the lowest possible limit, and it was necessary to observe the greatest economy in deciding upon the kind of structure and the materials to be used in designing the structure. The condition of the river and river bed was not suitable for the use of intermediate piers, but the presence of solid rock on the right bank of the river and a hard gravel on the left favored the adoption of an arch.

As there were no stone quarries in the vicinity, the best material for producing most excellent cement was located within a short distance. It was decided to build the arch of concrete. Comparative estimates showed this to be a cheaper construction than either a Monier arch or one of iron alone, or of cement blocks. An important feature of the design for the bridge was the vision of Max Leibbrand, a well-known German engineer. The traffic between the two points to be connected being very small the appropriation had been put at the lowest possible limit, and it was necessary to observe the greatest economy in deciding upon the kind of structure and the materials to be used in designing the structure. SPORTS IN GENERAL

Winding Up the Season of Local Cycle Races.

THE 'GENE FIELD MONUMENT FUND

Meeting of the Basket Ball League Tonight.

OFFICIAL BASE BALL SCORES

Interest in the record race meet Saturday at the International Athletic Park is greatly increasing among local racing men.

It was virtually a wheelman's holiday, and some good racing can be expected. The open events will be competed for with more vim than in previous races, owing to the fact that it is the closing day at the park, and most likely the closing open races of the season. In the record attempts there will be more display than was at first anticipated, as the local men are anxious to show their prowess, if only to hold them for a short time.

The one-mile District championship tandem race is also likely to prove a surprise. Paul von Hockman and E. A. Pitkin of the Quaker Wheelmen and Harry Z. Greer and George E. Smith of the Washington Road Club were upon as the closest competitors for the honor. Now it is understood that a change has been made in the first tandem team, and that Pitkin will not ride. One mile tandem is said to have taken his place. In this race there will be pacing furnished by George Hall and the two-mile tandem by the team which came in second in the race at the national circuit meet, but who are not eligible to race for the District championship. Schuchman and the Quaker Wheelmen will make a lively race.

FOR THE FIELD MONUMENT.

List of Events for the Bicycle Meet Now Ready.

The list of events and the entry blanks are now ready for the bicycle meet to be held at Columbia Field October 31 for the benefit of the Eugene Field monument fund. The entries are in charge of Mr. W. Stinemetz, who is chairman of the race committee, and entry blanks may be obtained on application to him at the Columbia Athletic Club.

The first thing on the program of the meet will be the one-mile race, for which several handsome prizes are offered, and which will be a unique feature of the affair. The drill will be for both ladies and gentlemen, and is under the charge of Mr. C. A. Wilson. The one-mile race will be conducted at Columbia Field before the meet comes off. The entries will be Monday, October 20, and the events will most likely enlist the aid of nearly all the local racing men for honors and prizes.

The list of events should promote some very good racing. It includes a one-mile open, a half-mile handicap, a one-third-mile open, a two-mile handicap, a one-mile race, and a one-mile race. The various committees in charge of the races will hold a meeting at the Riggs House tomorrow evening at 7 o'clock to make arrangements for the minor details of the affair.

Basket Ball League Meeting.

The District Basket Ball League will hold its second meeting this evening at 8 o'clock at the Washington Light Infantry armory. The rules will be discussed and adopted. The number of clubs in the league will be agreed upon, it being understood that the Quaker Wheelmen will have a representation at the meeting. A schedule committee will also be appointed, and possibly a corps of competent umpires selected for the season. The meeting will be held in the gymnasium of the club belonging to the organization.

Official Scores Almost Ready.

President Nick Young of the National Base Ball League announced last night that he would have the official scores ready for publication within a week. The delay was due to the delinquency of certain scorers who failed to send in promptly the result of their work.

Pillsbury Had a Bye.

The results of the eleventh round of the international chess masters' tournament, at Buda Pesth yesterday, are as follows: Charousek beat Winawer in a Ruy Lopez after twenty-nine moves.

Tarrasch beat Walbrodt in a Falkner gambit after forty-one moves.

Tschigorin won in a Giuoco piano after forty-one moves.

Schlechter beat Janowski in a king's gambit after twenty-one moves.

Maroczy and Maroczy drew a Ruy Lopez after twenty-one moves.

Noa beat Popiel in a king's fianchetto after thirty-two moves.

Pillsbury had
